Experience

Data Science Intern Madhav Institute of Technology and Science	Dec 2024 – Jan 2025
- Awarded an “A” grade for internship performance on developing machine learning models for predictive analysis. - Performed data preprocessing and exploratory data analysis with data visualizations.	
Open Source Contributor GirlScript Summer of Code (GSSoC) 2025	Aug 2025 – Oct 2025
- Contributed to multiple open-source projects using Git and GitHub and received official participation. - Ranked among the top 2.7% contributors nationwide.	
Virtual Intern – IBM SkillBuild	Sep 2025 – Oct 2025
- Completed a 2-month virtual internship focused on data, AI, and emerging technologies and earned official certification upon successful completion. - Implemented industry-aligned learning modules; distinguished among the top 1% of students to earn the capstone project completion certificate.	
Open Source Contributor Winter Code of Social (WCoS)	Dec 2025 – Feb 2026
- Collaborating with mentors and contributors . - Gaining hands-on experience in version control, code reviews, and collaborative development.	

Education

Madhav Institute of Technology and Science, Gwalior B.Tech in Information Technology Sept 2023 – Present CGPA: 8.7/10	Kendriya Vidyalaya No. 5, Gwalior CBSE – High School and Senior Secondary Education 2010 – May 2023 CGPA: 9.0/10
---	--

Achievements & Technical Skills

Achievements	Technical Skills
- Flipkart Grid 6.0 Hackathon Semi-finalist - Ranked 127 in 30k+ registrations of GSsoc'25 - Earned 'A' grade for Data Science Internship at MITS - Solved 450+ DSA problems on LeetCode using C++ and Python	Programming: Python, C++, HTML, CSS, JavaScript
	Frameworks/Libraries: Django, React.js
	Database: SQL, Microsoft SQL Server
	Concepts: Data Structures Algorithms, OOP, ML Techniques (Linear/Logistic Regression, K-Means)

Projects

Job Trends and Salary Analysis Dashboard	Python, Pandas, Scikit-learn
- Created an interactive dashboard to analyze job roles, trends, and salary insights using real-world datasets. - Used Pandas for data wrangling and Matplotlib for clear, insightful visualizations. - Applied statistical techniques and Scikit-learn tools to explore trends across domains and locations.	
Plant Disease Detection System	Python, Deep Learning
- Implemented a convolutional neural network (CNN) to detect and classify plant diseases from leaf images. - Trained the model on a custom dataset and achieved high accuracy on validation data. - Deployed the system for real-time predictions with an interactive interface.	
Wanderlust Website	Django, React, Redux, SQL
- Developed a travel recommendation platform with ML-based customer segmentation. - Designed and managed SQL database for efficient data storage and retrieval.	
Student Compass – Student Wellbeing Management Platform	Django, React, Python, API
- Refined a deployed full-stack web application to support student wellbeing and personal growth. - Built features for general wellbeing management and self-monitoring by habit tracking with streak maintenance.
